

LDI New Product: Coemar Reflection LEDko P W

Dec 31, 2012 7:49 AM, By Michael S. Eddy and Marian Sandberg

Coemar (<http://www.coemar.com/>)'s Reflection LEDko P W 5,600K is a profile that combines a hard- and soft-edged beam with a fixed white output at 5,600K correlated color temperature. It uses a 120W LED array and is compatible with various standard optics and accessories. It employs a four-blade framing system, with each shutter blade adjustable for radial position and angle. With 16-bit dimming, the light has two selectable curves that simulate tungsten or discharge lamp fixtures. It has a synchronized, random, or pulse electronic strobe; is ETL listed; and has an IP20 rating. The fixture has auto-sensing power 90-250V AC, 50/60 Hz, and comes with Neutrik PowerCON connectors.
